Rules and guidance for the use of the IECRE Logo
Overview of the IECRE System

2.0 General

The IECRE System is the IEC System for Conformity Assessment to Standards Relating to Equipment for Use in Renewable Energy Applications.

IECRE facilitates the operation of certification Schemes in strict accordance with the IECRE System Basic Rules, IEC CA 01 and IECRE 01-S, as approved by the IEC Conformity Assessment Board (CAB).

5.0 Objective

The objective of the IECRE System is to facilitate international trade in equipment and services intended for use in renewable energy applications. IECRE Schemes are intended to facilitate global trade as follows:

- Reducing testing and certification costs to manufacturer while maintaining appropriate levels of safety by compliance with Standards
- Reducing barriers to entry into established and emerging market places
- Reduced time to market
- Providing international confidence in the assessment process of IECRE products, services and personnel
- Providing one international database listing of all issued reports, certificates and other deliverables
